The Ca(2+)-transport properties of sarcoplasmic reticulum (SR) vesicles isolated from fast or slow skeletal muscle have been examined in order to study the differential regulation of these properties. In terms of Ca2+ transport kinetic parameters, the SR vesicles from fast muscle fibers were found to be more sensitive to Ca2+ activation than those from slow muscle fibers, suggesting the existence

Creative Commons Attribution-NonCommercial-NoDerivs License 2.5 In a new interview for Men's Journal, Katie Holmes opens up about how she used to fight her then-husband Tom Cruise's work ethic. Someday, Katie would love to have a baby, too. But before that, she wants to find a cause she really believes in. Around the time Katie was dating Tom Cruise, she'd be hearing his team of people tell his handlers he was slacking off. He'd come home from a long, hard day of shooting, a tiny little bite mark on his forehead, staring at the wall. "Wake up!" she'd say. "You have work to do." But the truth was, Cruise had never been especially committed to his own work ethic, and now that he was in his 50s, he'd settled into a pattern of long days that began with a four-hour meeting in the morning, followed by a four-hour meeting in the afternoon, followed by a six-hour meeting in the evening. His team would tell her how hard he was working on his new movie, she'd warn him not to fall behind. The same way he might be expected to tell her to sleep in, he'd tell her to stop nagging. Finally, with little or no sleep, he'd lie on the couch and watch TV. These days, Katie says, she wishes she'd have taken him to task then and there. In hindsight, she adds, "It was a career thing." They were so young. He had the work ethic. She didn't. That would change, and not just because the two were officially married. Around the time she gave birth to Suri, in 2011, Katie became even more ambitious. She started speaking out about how much she wanted to see an end to gun violence in America, after she read about the shooting of her childhood friend Emilie Parker, who was three months pregnant when she was killed in an Aurora, Colorado, theater. She came to believe that she had a unique power to "make a difference" by marrying into a powerful celebrity family. She says she also wanted to make art in her own way. At the time, Katie had
